Objective

Motivated and self-driven **B.E. in Artificial Intelligence & Data Science graduate (2026)** from **SITRC Nashik, SPPU**, with practical, project-based experience across software development, deployment automation, cloud infrastructure, and system monitoring. A fast learner who stays updated with modern AI-assisted engineering tools and is passionate about continuously building new technical skills. Seeking an entry-level position to contribute strong technical fundamentals, ownership, and adaptability – while continuously learning and growing with the team.

Technical Skills

Programming & Scripting	Python, Bash, C, C++
Databases	MySQL, PostgreSQL
Tools & Practices	Git, Postman, Linux, REST APIs (design, testing & integration)
Containers & Orchestration	Docker, Kubernetes
CI/CD & Automation	GitHub Actions, Jenkins, GitOps, Terraform, Agile/Scrum
Cloud (AWS)	EC2, S3, VPC, IAM, ELB, RDS, Lambda, SQS, SNS, CloudWatch
Messaging & Streaming	Apache Kafka, Kafka-Python, SQS, SNS
Monitoring & Reliability	ELK Stack, CloudWatch, Incident Response, Uptime/SLA Monitoring
AI Tools & AI-Assisted Engineering	LangChain, ChatGPT, Claude AI, GitHub Copilot, Google Gemini, Cursor AI, Perplexity AI – used for code generation, debugging, IaC authoring, and workflow automation

Professional Experience

DevOps Intern – Mayuri Technologies, Nashik (Final Year B.E. Internship)	Jan 2025 – Jul 2025
- Completed a 7-month DevOps internship alongside my final year of B.E. in Artificial Intelligence & Data Science, gaining hands-on experience in CI/CD, cloud infrastructure, and deployment automation. - Built CI/CD pipelines using GitHub Actions, reducing manual deployment steps by ~40% and cutting release cycle time from 2 days to under 4 hours. - Deployed and monitored web applications on Linux (Ubuntu) using Prometheus and CloudWatch, achieving 99%+ uptime and reducing incident response time by ~50%. - Collaborated in Agile/Scrum sprints with 5 developers; implemented Git branching, code-review gates, automated linting, and Bash/Terraform-based infrastructure provisioning across the SDLC.	

Projects

EduReg – Student Registration Platform (Personal Project)	Aug 2026
Python, Flask, REST APIs, MySQL, JWT, Kafka-Python, Docker, Microservices github.com/ombhondve/EduReg	
- Built a full-stack student registration platform with a Flask + MySQL backend, featuring an admin dashboard, analytics, and CSV export for institutional record management. - Designed and implemented REST API endpoints with JWT-based authentication and silent token refresh for secure, uninterrupted sessions.	
HealthForge – AI-Powered Healthcare Assistant (Final Year Project)	Nov 2025 – May 26
Kotlin, Jetpack Compose, Firebase, Google Gemini AI, MVVM, Room DB	
Architected an offline-first MVVM app with Room DB and Firebase Firestore real-time sync across 3+ user roles; integrated Gemini AI for personalized recommendations (50+ users, 90%+ satisfaction).	
End-to-End Web Deployment – Shree Combines (Final Year B.E. Internship)	May – Jun 2025
Jenkins, GitHub Actions, Linux, Prometheus, Grafana	
- Automated a full build-test-deploy pipeline with Jenkins, cutting deployment time from ~45 min to under 5 min while sustaining 99%+ uptime across 500+ daily requests. - Configured Prometheus/Grafana dashboards with real-time alert rules for proactive incident management.	
Smart Home Automation – IoT Dashboard (3 Year Project)	July 2024
IoT Sensors, Arduino Dashboard, Arduino Cloud, Arduino service provider	
Led a team as Project Leader; built Python/boto3 scripts for 15+ IoT sensors, reducing data latency from 8s to under 1s via optimized REST API polling. Presented to 100+ faculty and industry guests.	

Education

B.E. in Artificial Intelligence & Data Science – SITRC, Nashik (SPPU)	CGPA: 7.05
July 2026	
HSC (Science) – MSBSHSE	61.67%
SSC – MSBSHSE	66.80%

Certifications

DevOps Training – Mayur-i-Technologies	Nov 2025
Python Programming – Mayur-i-Technologies	Aug 2025
